

SUMMARY

A motivated, responsible and professional Full-Stack developer with 8+ years of experience in Software Development. Demonstrating exceptional teamwork, communication, and creative thinking skills. Eager in challenges and new technologies.

EXPERIENCE

Jul 2022 - Current

Full-stack Developer

Lotte Innovate, Ho Chi Minh City

Intranet

Description: The Intranet is an internal web-based platform developed for Lotte Innovate, designed to streamline administrative processes and asset management within the organization. It provides a centralized menu structure that enables employees to efficiently handle various internal services under two main categories: Administrative Support and Asset Management, covering employee support, office operations, welfare services, and comprehensive asset lifecycle management.

Responsibilities:

- Developed both front-end and backend based on the existing design and integrated it with the Menu API.
- Collaborated with QC to write and execute System Integration Testing (SIT).

Technologies: NextJs, NestJs, SQL Server

NICE Api Portal

Description: The portal is a product catalog and collaboration hub for APIs: API providers register and publish APIs and services (with metadata, versions, and visibility), product owners group and promote services, and support content like FAQs and discussions help users evaluate offerings. Consumers search, browse, read interactive documentation, compare services, and request access or credentials to integrate APIs. Administrators review and approve API publications, manage listings, moderate discussions/FAQs, and control access and lifecycle (publish, deprecate, version).

Responsibilities:

- Developed both front-end based on the existing design and integrated it with the Menu API.
- Developed reusable components

- Review and support teams in developing features based on requirements.
- Collaborated with QC to write and execute System Integration Testing (SIT).

Technologies: NextJs, NestJs, MySql

Obranding

Description: OBranding is a Vietnamese digital commerce and brand-development ecosystem operated by OpenLive, designed to help businesses accelerate digital transformation, strengthen brand visibility, and expand their market reach. The platform integrates B2B trading and RFQ matching, B2C e-commerce, the exclusive SÀN H membership card, and supporting solutions in technology, digital media, and brand identity. By connecting businesses, suppliers, partners, and consumers within a secure and transparent ecosystem, OBranding aims to create new sales opportunities, reduce operating costs, promote sustainable growth, and help Vietnamese brands compete in both domestic and international markets.

Responsibilities:

- Developed the front-end based on the existing design and integrated it with the Menu API.
- Developed reusable components
- Review and support teams in developing features based on requirements.
- Collaborated with QC to write and execute System Integration Testing (SIT).

Technologies: NextJs, ReactJs, Vite, NodeJs, MySql

Hotel PMS

Description: Hotel PMS is a management software for the Lotte Hotel chain nationwide, including features such as customer management, staff management, room management, reporting and analytics, membership, and more.

Responsibilities:

- Developed the front-end based on the existing design and integrated it with the Menu API.
- Developed reusable components
- Review and support teams in developing features based on requirements.
- Collaborated with QC to write and execute System Integration Testing (SIT).

Technologies: ReactJs, Vite, Java, MySql

Glottoss

Description: Glottoss

Responsibilities:

- Developed on both FE & BE based on the existing design
- Collaborated with QC to write and execute System Integration Testing (SIT).

Technologies: ReactJs, Vite, .NET Core, MySql
